

Herlinde Mannaerts-Drewe

Senior Vice President,
Oil and Gas Technology,
bp

Bio:

Herlinde Mannaerts-Drew leads bp's Oil and Gas Technology organization and is based in Sunbury, UK. She has over 20 years of industry experience of which the majority has been with bp. By background, she is a Site Investigation Geophysicist.

More recently, Herlinde was the Geophysics Discipline Director and Global Seismic Delivery Manager for bp's Geoscience Leadership Team, followed by a role in Innovation & Engineering as Manager Complex Imaging responsible for setting the direction in imaging R&D for the company. In her role as VP Subsurface Transformation & CCUS, she was responsible for the subsurface element of CCUS and geothermal as well as the digital and innovation strategy for Subsurface. Herlinde is married and has two children. She enjoys outdoor activities with the family and a good book, if time allows.
